„Climate Neutrality and Resilience in Organisations“ – ISO 9001 certified, endorsed by the Austrian Federal Ministry for Climate Action

Guiding organisations on the path to carbon neutrality and climate resilience requires people with a deep understanding of the problem to develop the necessary solutions. Courageous multipliers who can advise and support companies based on science, facts and evidence are now in demand.

With this training you will:

Gain deep knowledge for the climate transition:

Our science-based training equips you with the expertise needed to drive meaningful climate action – key for achieving both climate neutrality and resilience.

Our trainers have many years of experience and an extensive expertise and are ready to share it with you to help you maximise your impact!

Learn and apply practical methods and tools:

We provide hands-on strategies, proven tools, and process know-how to help you implement real-world green transformation projects. Throughout the course, you'll actively apply your knowledge in practice, and refine your ideas with expert guidance.

Join a strong network and community:

With keeping the groups small and interactive, you'll have the opportunity to engage with like-minded professionals during the course. After completing the course, you'll have an opportunity to become part of a community that continues to network, collaborate, and advance sustainability initiatives.

Contents of the Course

CLIMATE KNOWLEDGE

Delivering data-driven, science-backed expertise and know-how

BEYOND the STATUS QUO

Up-to-date guidance and latest insight on evolving regulatory requirements

TOOLS and METHODS

Practical tips and tricks for choosing and applying the right models and strategies

CONSULTING

Supporting the development of tailored pathways to climate neutrality & resilience

8 DAYS PACKED WITH VALUABLE INSIGHTS AND EXPERTISE

Pragmatic and fact-based, aimed at pioneers and multipliers involved in achieving climate neutrality and resilience.

Module 1

Kick-off

Thursday, 11 September 2025, 14:30 - 18:30

Introducing the training objectives, setting goals and establishing common ground for the added value

Module 2

The Basics

Friday, 12 September 2025, 9:00 - 17:00

Defining terms and definitions, exploring opportunities and risks for organisations, wider climate frameworks and deep dive into facts

– P/O

Module 3

Methods & Tools for Climate Neutrality

Thursday, 9 October 2025, 14:30 - 18:30
Friday, 10 October 2025, 9:00 - 17:00

Setting science-based targets, incorporating scopes & ESG, working on goals for neutrality, offsetting

– P/O

Module 4

Methods & Tools for Climate Resilience

Thursday, 13 November 2025, 14:30 - 18:30
Friday, 14 November 2025, 9:00 - 17:00

Exploring climate impacts and vulnerabilities, establishing climate risk assessments, developing climate resilient pathways

– P/O

Module 5

Consulting Practice Insights

Thursday, 11 Dezember 2025, 14:30 - 18:30

Concrete examples from business cases and real-life consulting experience, applying it to participants' cases

Module 6

Hands-on Approach & Wrap-up

Friday, 12 Dezember 2025, 9:00 - 17:00

Assessing the acquired knowledge, reviewing the training, planning future projects, testing & networking

P/O Transfer of learning between the modules.

P: Peer Learning Sessions. Work in pairs to solve specific tasks set after the modules, and collect open questions.

O: Online Sessions. Learnings are shared in one-hour online sessions. Open questions are answered by the trainers.

What makes the training stand out:

Experienced teams of trainers sharing all their knowledge, diverse backgrounds and perspectives

Small groups, allowing for in-depth exploration of individual situations and questions in a highly interactive setting

Knowledge transfer through peer group work and online sessions between classroom modules, as well as accompanying self-reflection sessions

THE TRAINERS OF THE ACADEMY FOR CLIMATE ACTION

**Barbara Simonič,
Climate Policy & Sustainability
Expert, Director Klimalab**

I have 15+ years of experience in climate policy, leading EU projects, managing multi-million euro funds and advising the government. Responsibilities included developing a national climate adaptation strategy, as well as liaising with international bodies. My expertise lies in driving impactful climate solutions through policy, finance, and strategic innovation.

**Marion Zöchbauer,
Managing Director and
Co-Founder**

As a consultant to and in a wide variety of organisations since 2005, I would like to scale up the transfer of expertise quickly and efficiently in order to sustainably expand companies' expertise on the topic of climate neutrality. This training provides consultants and multipliers with the right basic framework to support companies on their path to climate neutrality.

**Johannes Naimer-Stach,
Managing Director and
Co-Founder**

From emissions trading, to the WWF, to the EU's Climate-KIC agency: As a climate protection expert of many years' standing, I am keen to make the knowledge I have acquired in a wide variety of areas since 2008 available to all those who want to make a contribution to achieving climate targets. According to the motto: We can never have enough people who are committed to climate neutrality.

With almost 100 participants across Europe, including Austria, Germany and Ireland, our training sessions have had a significant impact. Since its launch in 2022, the Academy for Climate Action has conducted 12 masterclasses. See what people are saying about the training [here](#).
